Location: Yemen | Available for Relocation and International Opportunities

Professional Summary

Software Engineer specializing in enterprise SaaS systems, multi-tenant platforms, payment infrastructure, ERP solutions and cross-platform applications using Flutter, PHP and SQL technologies. Experienced in building complete business ecosystems for humanitarian organizations and commercial clients, including donation platforms, HR systems, analytics dashboards and operational management solutions. Strong background in scalable architecture, API integrations, payment processing, data isolation strategies and enterprise reporting systems.

Technical Skills

- **Programming Languages:** Dart, PHP, SQL
- **Frameworks & Libraries:** Flutter, GetX, Dio Networking
- **Databases:** MySQL, SQLite, Firebase Firestore, Firebase Realtime Database
- **Architecture:** SaaS Multi-Tenancy, RBAC, JWT Authentication, API Gateway Design, Headless CMS
- **Payments & Financial Infrastructure:** AzamPay, PayTabs, Paylink, PayPal, Webhooks, IPN Processing, Payment Reconciliation, Server-to-Server Payment Integrations
- **Platforms:** Android, Web, Windows Desktop
- **Reporting:** Dynamic PDF Generation, Analytics Dashboards, Executive Reports
- **Concepts:** REST APIs, Multipart Form Data, Rate Limiting, Logging Middleware, Responsive UI/UX

Project Experience

Enterprise Donations System (SaaS)

- Architected a scalable multi-tenant SaaS environment supporting multiple organizations from a shared infrastructure.
- Implemented centralized API gateway logic with tenant resolution using JWT decoding and tenant-scoped SQL queries.
- Engineered secure server-to-server payment infrastructures integrating AzamPay, PayTabs, Paylink and PayPal through webhook-driven architectures, IPN listeners and automated payment reconciliation pipelines.
- Built automated donation reconciliation workflows using IPN processing and event driven updates.
- Developed a headless CMS powering public donation websites, campaigns and organization branding.
- Created dynamic payment credential management allowing runtime sandbox and production switching.
- Implemented request logging, audit trails and SQL-based rate limiting protection.
- Developed financial dashboards, donation analytics and project monitoring reports.
- Implemented automated project numbering and configurable workflow engines.
- Designed the platform to support white-label deployments for multiple organizations.

Operational ERP Platform for Humanitarian Organizations

- Developed enterprise operational systems used for campaign management and humanitarian projects.
- Implemented project lifecycle tracking, documentation workflows and field activity monitoring.
- Built role-based access control systems supporting multiple organizational structures.
- Generated real-time dashboards and automated PDF reports for management teams.
- Integrated biometric attendance devices and logistics tracking solutions.

Attendance & Payroll Management System

- Developed attendance, payroll, leave and employee management modules.
- Integrated biometric attendance synchronization directly with backend services.
- Implemented automated salary calculations, deductions and attendance policies.

- Developed employee and administrator portals including objection workflows.
- Created payroll summaries and detailed attendance reporting pipelines.

Gheta Yateem Sponsorship System

- Designed sponsorship lifecycle management workflows for humanitarian organizations.
- Built sponsor, mediator and beneficiary management interfaces.
- Implemented reactive validation and streamlined enterprise data entry processes.
- Developed dynamic selection systems supporting on-the-fly entity creation.

Wazeena Projects Dashboard

- Designed executive dashboards and KPI monitoring interfaces.
- Implemented responsive web layouts optimized for management reporting.
- Developed automated PDF export workflows for stakeholders and executives.

Gheta Projects Analytics

- Developed project analytics dashboards and operational reporting systems.
- Implemented interactive visualizations and project health indicators.
- Built executive level reporting exports for management teams.

Sakan Rahmah Employee Portal

- Designed highly optimized A4 PDF reporting layouts.
- Implemented dynamic typography scaling and container calibration.
- Developed employee profile generation and reporting pipelines.

Smart Garden IoT Platform

- Developed IoT monitoring solutions using real-time sensor data collection.
- Implemented automated irrigation workflows and remote control mechanisms.
- Built Firebase powered synchronization dashboards and environmental monitoring tools.
- Created visual reporting interfaces for agricultural data analysis.

Project & Construction Management Platform

- Developed project planning and cost estimation modules for construction projects.
- Implemented dynamic cost calculations and configurable project templates.

- Built workflow tracking systems covering project phases from initiation to completion.
- Generated management reports and operational summaries for stakeholders.

Professional Experience

- **Software Developer — SMTechSA** (2025, Remote • Saudi Arabia)
- **Software Developer — Gheta Alrahmah** (2024–2025, Taiz, Yemen)
- **Software Developer — Ayat** (2024, Remote • Kuwait)

Education & Certifications

- Bachelor's Degree in Information Technology — University of Science and Technology, Sana'a
- TOEFL iBT Certification
- Diploma in Application Software
